World Hepatitis Day

and Indian methods.

08

- They formalized the Decimal positional system making division and multiplication algorithmic — paving the way for written factorization tables.

11

- Al-Karaji in particular discussed numbers that are "composed" and "prime" and used explicit examples of factorization via division by smaller primes.

03

- This is where the step-by-step written process for decomposition begins to look like our school algorithm.

06

4. The European school tradition (Renaissance-18th century)

IMPORTANT NOTE

- With the reintroduction of Hindu-Arabic
